Double Patenting

1. Claims 1, 9, 13, and 17 are rejected under the judicially created doctrine of double patenting over claim 1 of U. S. Patent No. 6,266,769, 6263,426, 6292,815 and claim 14 of U.S. Patent No. 6,247,116, since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: the conversion between a first plurality of numbers stored in a packed register of a first set of architectural registers and a second set of numbers stored in a second packed format in a second set of architectural registers.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

2. Claims 2-8, 10,12, 14-16, and 18-30 are also rejected by virtue of their dependence upon a rejected independent claim.
